About Us

GAS DETECTION

Emerged... as the most recent sister company in FERASA Group, comes with even broader activity range that spans all essential six oilfield technical. Its activities are integrated with the international arm of the Group, Ferasa Int'l Trading and Construction Co.Ltd. and Ferasa Tasharukia. Over the years... FERASA Int'l has acquired extensive business services that are growing steadily and what once a typically local supplier has become a company that regards the entire Libya and across the border as its market place. Today, FERASA represents partners from Europe serving around 300 clients worldwide. This trend is continuing and whenever a new project requiring oil & gas field technical services emerges FERASA is on hand. The company therefore places great emphasis of finding working partners and product suppliers abroad who can meet these important work standards. All these efforts invested to improve our quality of work are rewarded with satisfied customers who come back year after year.

Engineering & Design

Supplying & Instalation

After Sales Services

Ferasa's mission is to be the best provider of fixed-point gas detection systems in Libya. We strive to provide the highest quality and best customer service – every customer, every transaction, every time.

Our products are always application-driven and solution-oriented. Whether for a single application or multiple rooms and areas, our fixed-point monitoring solutions are developed to meet the unique needs of our customers. Whether on-site, or from site drawings our team provides you with the best design and maintenance plan for your fire and gas detection solutions.

Our team of engineers works directly with customers to optimize the performance and cost of each application. Our services include system conception, design, installation and servicing. Each system is fully documented and delivered ready for installation.

Asbestos Treatment

We offer a full range of asbestos management related services, from initial building inspections, surveys and inventories, through to risk assessments, feasibility studies, complete decontamination projects, 'Asbestos-safe' & 'Asbestos-free' certification, and on to fitting and replacing products and renovation works.

Our programs identify the types of asbestos present within the building and the forms, quantities and condition in which they exist. In the case where this inventory has not yet been established we can execute these works.

Asbestos Encapsulation

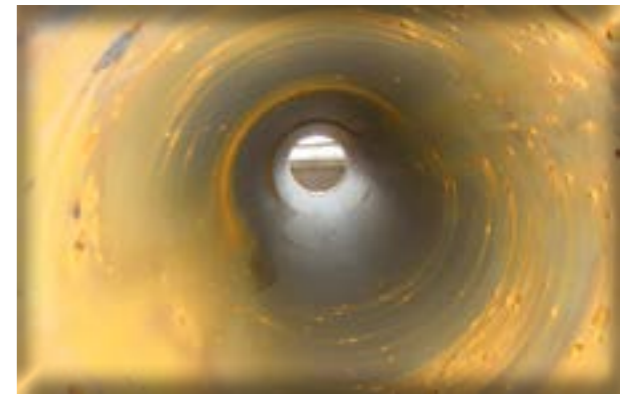

Corrosion Monitoring and Cathodic Protection

Ferasa specializes in the design of chemical injection and corrosion monitoring systems and is able to ensure successful project implementation of corrosion monitoring systems at any location in Libya.

Ferasa can provide its customers a complete range of products and services in all the fields and can also provide them with full studies, audits, designs, operations and all after-sales services.

We provide our customers the best quality of products in the field of Corrosion Monitoring and Cathodic Protection such as:

- ACCESS FITTINGS
- CORROSION MONITORING EQUIPMENT
- CHEMICAL INJECTION EQUIPMENT

Repair and Maintenance
